

Criteria	OUTSTANDING A* Marks in the range 80%-100%	EXCELLENT A Marks in the range 70%-79%	COMPETENT B Marks in the range 60%- 69%	SATISFACTORY C Marks in the range 50%-59%	ADEQUATE D Marks in the range 40%- 49%	MARGINAL FAIL E+ Marks in the range 35%- 39%	NON MARGINAL FAIL E- Marks in the range 30%- 34%	Fail F Marks below 30%
<p>1) Context and Framing.</p> <p><i>Have you identified a problem or a domain of application for your system? Have you described in detail the context in which your application is relevant?</i></p>	A		A					

<p>3) Data analysis</p> <p><i>Think of three or four possible categories of users of your system, and for each focus on one or two functionalities that will be carried out by your system and you understand well. Have you listed which information is going to be used/exchanged in these processes? Have you listed the main notions (entities) that support these functionalities, and explained what they represent, in plain text? Have you listed for each entity, the main features you need to include in the database (possibly pointing back to the functionalities you are supporting)? Have you included a glossary of the terms that must be included in the final database?</i></p>	C	C	A	A	A		
<p>4) Coherence and Structure</p> <p><i>Are the various parts of your report integrated into a coherent whole? Is the text well structured, logically? Is the language appropriate and the style polished? Is the text free from grammar and spelling mistakes?</i></p>	C			C	C
